

Instructions for the Choice Tasks

Please read this page carefully before answering the choice questions.

Purpose of the study

This study examines how people evaluate public policies aimed at reducing pesticide use in agriculture.

Your task

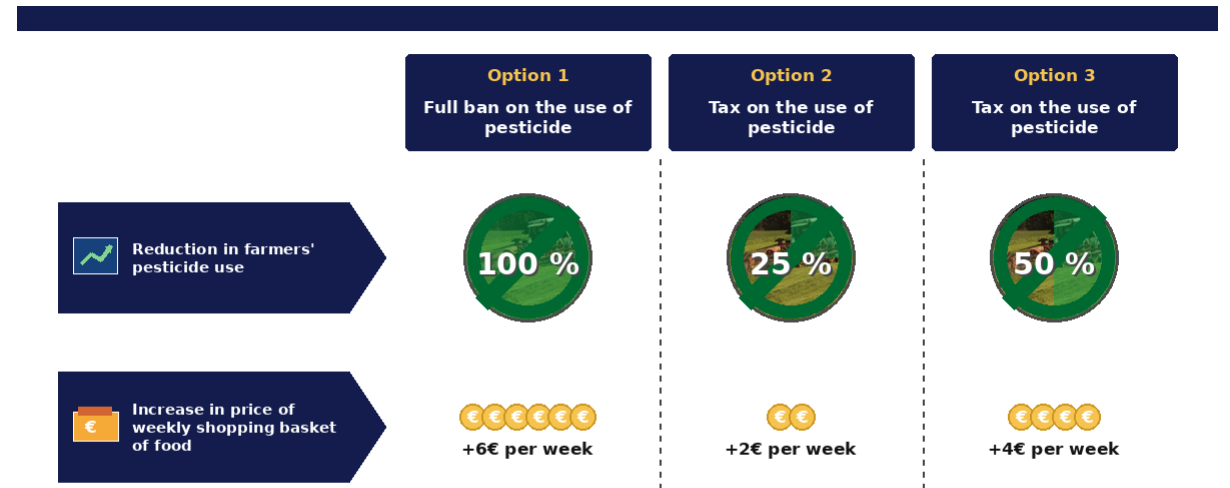

For each choice task, you will see three policy options. Please choose the option you would prefer if these policies were proposed.

Each option has two attributes

- **Reduction in farmers' pesticide use:**
0%, 25%, 50%, 75%, or 100%
- **Increase in your weekly food basket:**
0 to 6 euros per week

Important:

There are no right or wrong answers.
We are interested in your personal preferences.

Example

Option 1 is a full ban. Options 2 and 3 are tax policies with lower pesticide reductions and lower weekly food-cost increases.

Before continuing: Please confirm that you understand how to answer the choice tasks.
